

ANKIT

Data Analyst & Project Coordinator | Analytics • BI • Stakeholder Management • Process Optimization

ankitdabur08@gmail.com | +91 8684849586 | [GitHub](#) | [LinkedIn](#)

Master of Computer Applications (AI & ML) - Chandigarh University, Punjab

SUMMARY

Data Analyst skilled in SQL, Python, and BI tools (Power BI, Tableau) with hands-on experience across end-to-end analytics workflows - data cleaning, exploratory analysis, KPI development, and dashboard building. Adept at translating business questions into data solutions, coordinating cross-functional stakeholders, and owning projects from requirement-gathering to delivery. Experienced in transforming raw datasets into business-driven insights across retail, e-commerce, and financial domains, with published research demonstrating analytical rigor.

EXPERIENCE

CSIR - National Physical Laboratory (NPL)

Apr 2024 - May 2024

Software Engineering Intern

- Led the design and rollout of a secure digital employee data system serving **200+ staff across 5 departments**, reducing manual record-retrieval time by **~50%** through role-based access workflows.
- Gathered requirements from **4 cross-functional teams** and translated them into internal workflow features (booking, ordering) on a cloud-backed serverless architecture, driving **~70% adoption within 6 weeks**.
- Implemented QR-code-based selective data sharing with real-time synchronization, **cutting data-sharing turnaround by ~40%** and standardizing access policies across 5 departments.

PROJECTS

Zeptalytix - Zepto SQL Analytics Pipeline / *Excel, SQL, PostgreSQL, Reporting - [github](#)*

- Owned an end-to-end SQL analytics pipeline on a real-world Zepto e-commerce inventory dataset, covering database design, data cleaning, and exploratory data analysis (EDA).
- Performed data-quality fixes (null handling, invalid-entry removal, paise to rupee normalization) to ensure accurate financial analysis.
- Wrote 20+ business-driven SQL queries (GROUP BY, aggregates, CASE logic) to surface insights on pricing, discounts, stock availability, and category-wise revenue.

CustomerLens - Retail Customer Insights / *Python, SQL, Power BI - [github](#)*

- Defined and delivered a retail customer analytics project uncovering purchasing behavior, segmentation, and churn/retention patterns from transactional data.
- Performed customer segmentation (RFM analysis) and cohort analysis to identify high-value customer groups and improve targeting.
- Built interactive dashboards visualizing customer KPIs, sales trends, and retention metrics to support business decision-making.

StockVista - Multi-Asset Market Insights Platform / *Python, Pandas, Tableau - [github](#)*

- Processed and analyzed historical stock-market datasets of 6 major technology companies using Python and Pandas for trend and performance analysis.
- Implemented technical indicators (50-day and 200-day moving averages, daily price fluctuations, trading-volume analytics) for market insight generation.

- Built interactive Tableau dashboards for trend analysis and financial reporting, streamlining recurring reporting workflows.

EDUCATION

Master of Computer Applications (AI & ML) Chandigarh University, Punjab CGPA: 6.7/10	2024 - 2026
Bachelor of Computer Applications K.R. Mangalam University, Gurugram, Haryana CGPA: 7.53/10	2021 - 2024

TECHNICAL SKILLS

Programming & Querying: SQL (Joins, Subqueries, CTEs, Window Functions), Python (Pandas, NumPy)

BI & Visualization: Power BI, Tableau, Dashboard Development, Data Storytelling

Data Analytics: Data Cleaning, EDA, Data Preparation, KPI Reporting, Customer Segmentation, Financial Analytics, Excel

Management & Collaboration: Requirement Gathering, Stakeholder Coordination, Business Reporting, Documentation

CERTIFICATIONS

- Cisco - Data Analytics Essentials
- Simplilearn (powered by Microsoft) - Data Analyst 101
- Coursera - Mastering Advanced SQL Queries
- IBM - Big Data 101
- Samatrix - Data Analysis Using Python; Data Science & Data Analysis

RESEARCH & PUBLICATIONS

- Published research paper - Zenodo: zenodo.org/records/20437514
Benchmarked LoRA vs. Prompt-Tuning on DistilBERT for low-resource sentiment analysis.
